Technical and Business Writing PP Spring-25

Short Questions

1. **What is a feasibility report?**
A feasibility report is an important business document that is used to check whether a project, plan, or idea is practical and possible or not. Before starting any project, organizations prepare a feasibility report to reduce risk and make better decisions.

This report examines various aspects of a project, including technical, financial, operational, and time feasibility. It helps managers determine whether the project can be completed with available resources, within budget, and within the given time.

The main purpose of a feasibility report is to analyze the advantages and disadvantages of a project. It also identifies possible problems and suggests solutions. After studying the report, decision-makers decide whether to accept, reject, or modify the project.

Example
Before launching a new mobile application, a company prepares a feasibility report to check its development cost, market demand, and technical requirements. If the report shows positive results, the project is approved.

2. **What is the purpose of using summaries and abstracts in business documents?**
Summaries and abstracts are used to give a short overview of a long document. They help readers understand the main ideas and important points quickly without reading the entire document.

Purpose of summaries and abstracts
- save time for readers
- highlight the main points of the document
- help managers make quick decisions
- make long reports easier to understand

Abstracts are commonly used in research and technical reports. They help readers decide whether the full document is relevant to their needs or not.
Summaries also improve clarity and understanding by simplifying complex information into easy language. They are useful for presentations, meetings, and decision-making.

Example
A 50-page research report may contain a one-page summary explaining the main results and recommendations.

3. **Differentiate between exposition and argumentation.**

Exposition	Argumentation
It explains a topic clearly by giving facts and information so the reader can understand it easily.	It tries to convince the reader by giving opinions, reasons, and arguments to support a point of view.

It is objective in nature, meaning it does not include personal opinions and stays neutral.	It is subjective in nature, meaning it includes the writer's personal opinion and viewpoint.
The main purpose is to inform, describe, or simply clarify ideas.	The main purpose is to persuade the reader and prove that one idea is correct.
It uses facts, examples, and explanations only to increase understanding of the topic.	It uses evidence, logic, and sometimes emotions to support and defend an argument.
It is commonly used in textbooks, reports, and educational materials where information is important.	It is commonly used in essays, debates, and editorials where convincing the reader is important.

4. What are the common types of business letters?

Business letters are formal written messages used for communication in organizations. There are many types of business letters, each used for a specific purpose.
Some common types of business letters include:

Inquiry Letter
Used to request information about products or services.

Complaint Letter
Used when a customer wants to complain about a product or service.

Job Application Letter
Used when applying for a job.

Order Letter
Used to place an order for products.

Recommendation Letter
Used to recommend a person for a job or position.

Sales Letter
Used to promote or advertise products.

Each type of business letter follows a formal style and clear structure. These letters help maintain professional communication in business.

5. Define plagiarism and explain how it can be avoided in technical writing.

Plagiarism means copying someone else's work, ideas, or words and presenting them as your own without giving proper credit.
Plagiarism is considered unethical and dishonest in academic and professional writing.

Ways to Avoid Plagiarism
Plagiarism can be avoided by following these practices:

- **Give Proper References:** Always mention the source of information when using ideas from books, articles, or websites.
- **Use Quotations:** If you copy exact words from another author, use quotation marks.

- **Paraphrasing:** Rewrite the information in your own words instead of copying directly.
- **Use Citations:** Provide proper citations and references in the bibliography.

These methods help maintain honesty, originality, and credibility in technical writing.

6. **What are glossaries and bibliography in reports?**

In report writing, glossaries and bibliography are important parts that improve the quality and credibility of the document.

A glossary is a list of difficult, technical, or special words used in the report along with their meanings. It is usually placed at the end of the report. The purpose of a glossary is to help readers understand complex terms easily.

On the other hand, a bibliography is a list of all the sources that were used while preparing the report. These sources may include books, articles, journals, and websites.

The bibliography gives credit to original authors and helps readers find more information about the topic. It also shows that the report is based on proper research.

In summary, glossary improves understanding, while bibliography ensures authenticity and reliability of the report.

Long Questions

1. **Write a job application letter in response to the following ad:**
   - **Manager needed**
   - **Bachelor in business administration**
   - **5 years of Experience**
   - **Good communication and Computer skills.**

Dear Hiring Manager,

I am writing to apply for the position of Manager as advertised. I have completed my Bachelor in Business Administration and have 5 years of professional experience in management.

During my previous work experience, I have developed strong leadership, organizational, and communication skills. I have successfully managed teams, handled business operations, and ensured that targets were achieved on time. My ability to make decisions and solve problems makes me suitable for this role.

I also have good computer skills and am proficient in MS Office, email communication, and basic management software. I am confident in my ability to contribute effectively to your organization.

I am a hardworking, responsible, and dedicated individual. I am always willing to learn new skills and improve my performance. I believe that my qualifications and experience match the requirements of this position.

I would appreciate the opportunity to be part of your organization. I am available for an interview at your convenience.

Thank you for your time and consideration.

Yours sincerely,
[Your Name]

2. Explain briefly the different kinds of reports?

Reports are important written documents used in business and technical fields to present information in a clear and organized way. Different kinds of reports are prepared depending on the purpose, audience, and situation.

1. Informational Reports
These reports only provide information without giving any opinion or recommendation. Their purpose is to present facts in a clear way so that the reader can understand the situation.
Examples include progress reports, status reports, and routine reports. These reports are commonly used inside organizations.

2. Analytical Reports
Analytical reports go one step further than informational reports. They not only present data but also analyze it and give conclusions or recommendations. These reports help in decision-making.
For example, a feasibility report checks whether a project is possible or not and suggests whether to continue or not.

3. Formal Reports
Formal reports are detailed and highly structured documents. They follow a proper format including title page, table of contents, introduction, body, conclusion, and references.
These reports are usually prepared for important issues and external audiences.
Example: Research reports, annual reports

4. Informal Reports
Informal reports are short and simple. They do not follow a strict structure and are used for internal communication.
They are easy to write and understand.
Example: Memo reports, short emails

5. Progress Reports
These reports show the progress of a project over time. They tell what work has been completed, what is in progress, and what problems are faced.
They help managers track performance and make improvements.

6. Feasibility Reports
Feasibility reports are used to check whether a plan or project is practical. They analyze cost, time, and resources.
They help organizations avoid risks and make better decisions.

7. Recommendation Reports
These reports suggest the best solution to a problem after proper analysis. They include different options and recommend the most suitable one.

In business communication, different types of reports are used for different purposes. Each report helps in sharing information, solving problems, and supporting decision-making. Proper use of reports improves efficiency and communication in organizations.

3. Write a detailed note on electronic Communication and its role in business communication?

Electronic communication means sending and receiving messages through electronic devices and the internet. In today's modern world, it has become a key part of business communication.

Types of Electronic Communication

Email – Used for formal communication in business
Instant Messaging – Quick communication through apps like WhatsApp
Video Conferencing – Online meetings using Zoom or Microsoft Teams
Social Media – Used for marketing and customer interaction
Business Tools – Software like Slack, Google Workspace

Advantages of Electronic Communication

- Information can be sent instantly, saving time and increasing efficiency.
- It reduces costs of paper, printing, and travel.
- Employees can work together using shared documents and online tools.

Disadvantages of Electronic Communication

- There is a risk of data theft and hacking.
- Internet problems or system failures can disturb communication.
- Too many messages can create confusion and stress.

Role in Business Communication

Electronic communication plays a very important role in business:

1. Internal Communication
Electronic communication helps employees communicate easily within the organization.
For example, managers can send instructions through email or messaging apps, and employees can share updates. This improves coordination and teamwork.

2. External Communication
Businesses use electronic communication to interact with customers, clients, and suppliers.
Emails, websites, and social media help companies provide information, answer queries, and build strong relationships.

3. Fast Decision-Making
Electronic communication allows quick sharing of information. Managers can hold online meetings and make decisions without delay.

This increases efficiency and helps businesses respond quickly to problems.

4. Marketing and Promotion
Companies use electronic communication for advertising their products and services.
Social media, email marketing, and websites help reach a large audience at a low cost and increase sales.

5. Customer Support Services
Businesses provide customer support through emails, chat systems, and social media.
Customers can easily ask questions, give feedback, and get solutions to their problems, which improves customer satisfaction.

6. Team Collaboration
Electronic tools allow employees to work together even from different locations.
They can share files, edit documents, and communicate in real-time, which improves productivity.

7. Record Keeping and Documentation
Electronic communication automatically saves messages, emails, and files.
This helps in keeping records for future use, legal purposes, and reference.

Electronic communication has changed the way businesses operate. It makes communication fast, easy, and efficient. Although there are some challenges, its benefits are much greater. It is an essential part of modern business communication.
